

Dementia Care

Dementia affects around 820,000 people in the UK. This figure is likely to rise to one million by 2025 and two million by 2051. It is one of the main causes of disability in later life and with research being desperately underfunded, it costs the UK over £26 billion a year. Understanding dementia and the person-centred care that is required is fundamental to high-quality care.

Course Content

- Different forms of dementia
- How to support individuals through person-centred care
- Develop knowledge and understanding of care
- Positive communication methods
- Issues around the use of medication

Mandatory units

- Dementia awareness
- Person centred approach to care and support
- Factors influencing communication and interaction
- Equality, diversity and inclusion
- Administration of medication
- Behaviour in the context of dementia
- Benefits of engaging in activities in social care

Qualification

Fully Funded
Level 2 Certificate
Distance Learning

Guided Learning
Hours

123

Course length

10 weeks
