

As well as our comprehensive roofing services and products we are now able to offer a wide range of solar photovoltaic products. Steadfast Roofing Limited are MCS accredited. This means we are approved to commission, design, supply and install Solar PV panels and tiles.

We offer one point of contact for contractors to alleviate any issues with regard to system design and liaising with multiple trades i.e. smooth installation of Solar PV systems with the supply and fix roof tiling operation.

Solar PV roof systems meet level four of The Code for Sustainable Housing requirements for social housing and level three for private.

Solar PV systems are very reliable, with no moving parts they can be expected to last for over 25 years with minimal maintenance.

Systems are quick to install as part of the build process. The value of a house is typically increased by up to 6% with the inclusion of a Solar PV system.

### Steadfast now offer:

- A range of MCS accredited Solar PV modules
- Inverters
- Design service
- Commissioning
- Full installation service
- Aesthetically pleasing designs
- System orientation for maximum exposure to sunlight

We provide a range of Solar PV systems to meet the varying needs of our clients. We are able to incorporate Solar PV into new builds as well as retrofit systems on to existing roofs. We offer fully integrated, partially integrated and non-integrated roof systems.

We provide the complete Solar PV service including the roof covering, a range of Solar PV modules, inverters and associated electrical connections. We are able to guarantee the Solar PV system and the integrity of the roof.

Being a MCS registered company we are able to commission and sign off Solar PV systems to enable the customer to receive the FIT (Feed In Tariff).
