

Bring Your Money Closer for More Effective Controls

1. Real time results - Remove the gray areas from your data and process to reveal savings faster.
2. Increase collections with less vendor abrasion by addressing issues in a timelier manner.
3. Increase controls efficiency - Gain better visibility into your controls effectiveness. Make adjustments faster to maintain control.
4. Identify relevant and current control gaps faster within the Procure to Pay process which allows long term remediation.
5. Increase recovery and eliminate write offs, credits or other unknown applications initiated independently by vendors.
6. Identify spend optimization opportunities through data mining and benchmarking.
7. Change to a more proactive approach. Move from mere Detection to Prevention.
8. Initiate constant process improvement plan that identifies trends and inconsistencies quarterly before they become larger overwhelming issues.
