OEM of

Compact Self Protection Pod (CSPP) for UAVs & Light Aircraft (under development)

Developing a Compact Self Protection Pod for the UAV and manned aircraft market with the following properties and capabilities:

- Protection against radar guided missiles
- Low price
- Cost-effective performance, compare to larger and more expensive solutions
- Installed on the Air Vehicle per mission
- Equipped with highly capable systems which can defeat new generations of Surface to Air missiles, using DRFM deployed Jammers
- Capable of providing ELINT functions
