ADAPTABLE BLOTTER

AdaptableBlotter.JS is at the forefront of the next generation of applications set to revolutionise the financial desktop.

AdaptableBlotter.JS is an HTML5 vendor grid written entirely in JavaScript, enhanced and transformed into a powerful financial blotter ready for immediate use. Lightweight but immensely powerful, AdaptableBlotter.JS is the fastest fully-featured HTML5 grid available on the market.

AdaptableBlotter.JS contains the same rich range of viewing, editing, searching and sorting functions, auditing features, configuration options and single API benefits that users of the popular Adaptable Blotter.NET enjoy.

AdaptableBlotter.JS delivers a standardised interface across the organisation, allowing users across front, middle and back office to be as productive and efficient as possible.

How It Works

AdaptableBlotter.JS extends the grids provided by leading vendors, adding all the additional functionality required to allow systems and users to be fully productive.

Either choose your preferred vendor grid – or use our own custom, powerful, HTML5 grid – and have everything you need straight out of the box.

Grids Supported

- ❖ Our Adaptable Grid
- ❖ Telerik Kendo
- ❖ ag-Grid
- ❖ OpenFin Hypergrid
- ❖ And many more….

One Tool: Infinite Applications

One Tool : Infinite Applications

Our development team on AdaptableBlotter.JS has over 50 years experience delivering and implementing software solutions to the banking and financial industry.
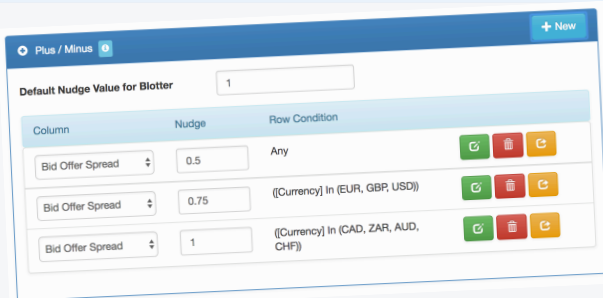

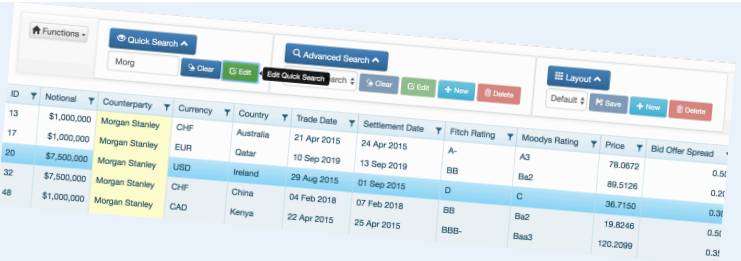

We have involved users across banking areas in our design. This has allowed us to create an unparalleled range of functions, accessed intuitively, and allowing you to view and edit your data exactly how you want.

However you want to see and manage your data, Adaptable Blotter.JS can help.

|			
Advanced Search	Audit	Calendar	Cell Validation
Column Chooser	Conditional Style	Custom Sort	Export
Filter	Flashing Cell	Layouts	Plus/Minus
Quick Search	Shortcut	Smart Edit	Theme Picker

Search and View

Use our saveable Search functions to see only the rows you want. Let Custom Filters, Layouts, Flashing Cells and Column Sorts help you to set up your Blotter to fit your needs perfectly.
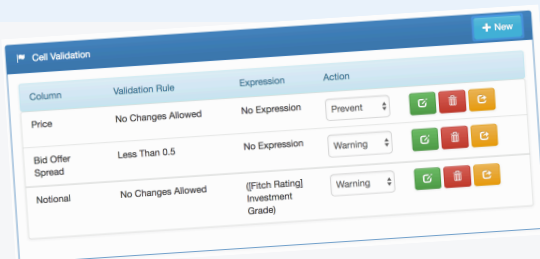

Edit and Update

Amend your data faster and more safely than ever before. Plus / Minus allows you to specify how values should increment based on your rules, while SmartEdit helps you to bulk update multiple cells quickly and efficiently.

Audit and Validate

Let AdaptableBlotter.JS become your first line of Compliance and Regulatory defence. Shortcut, Validation and Warnings functions will prevent you making mistakes; Every action and data change is fully audited so you can be informed immediately something happens that matters.

Create and Share

Our intuitive wizards allow you easily to create your own searches, views, shortcuts, editing rules and much else. And our 1-click sharing means the rest of your team can access them immediately.

Licences and Other Services

AdaptableBlotter.JS will be covered in the same licence as AdaptableBlotter.NET.

This licence includes all vendor grids and User Interface types.

Licences include full support and regular updates.

For pricing and licensing details email sales@adaptabletools.com.

AdaptableBlotter.JS does **not** include vendor licences.

Adaptable Tools is a division of Traders Tools Ltd. UK Company No: 8951210
