

Interview from farmer who tested our product “Excellent Combi One”  
“Excellent High Calcium Boron” and “napGibb”

The interviewee told us he soaked rice seed in napGibb before sowing.

The result was the rice grew up rapidly.

For using “Excellent Combi One” “Excellent High Calcium Boron”, the rice was stronger and full.  
The seeds were not easily broken like before.

He can get more yield. Previously in 4 hectares he will get 200 sacks of rice  
,but now he gets 225 sacks (increased by 10%). The quality is very good as well.

This year he just tested our products in 4 hectares ,but for next year he plans to use  
these products in the rest of rice field about 800 hectares.
