

Ergogenic field trials in tea

Here are some Ergogenic field trials in Taiwan.

The dosage ranges

1000-2500 times which depends on the number of applications.

Application

1st spray before sprout.

2nd spray 14 days apart from 1st spray.

3rd spray 3 weeks before harvest.

*Ergogenic does no harm to crops, it is safe to apply at intervals every of 2 ~ 3 weeks apart.

** Remarks: Please provide more water after application of Ergogenic to facilitate its metabolism and photosynthesis of the plant.
