

Ergogenie field trials in tomatoes

Here are some Ergogenie field trials in Taiwan.

The dosage ranges

1000-2500 times which depends on the number of applications.

Application

Usually apply first time before flowering (or seeding), second application after fruit setting and so on total 2 ~ 4 applications.

*Ergogenie does no harm to crops, it is safe to apply at intervals every of 2 ~ 3 weeks apart.

** Remarks: Please provide more water after application of Ergogenie to facilitate its metabolism and photosynthesis of the plant.
