SMART CHANGE SYSTEM

SMART CHANGE SYSTEM

New from Alberti, a complete range of live tools with interchangeable adapters for Okuma are now available in stock. The  **SmartChange** System units have a standard profile with **no additional projection** to reduce the chance of interference with the machine's enclosures. Alberti's patent pending design creates **three points of contact** between the driven tool holder body and tool holder output surfaces so there is no compromise in concentricity and rigidity to gain the speed and convenience of quick-change tooling. With the  **SmartChange** System one set of live tools can always stay in the machine with only the adapters needing to be changed. This provides **improved efficiency and flexibility**, plus a reduction in overall tooling costs.

QUICK, EASY & PRECISE

Triple Contact System	Low Profile	How It Works
 <p>First & Second Contact Points Third Contact Point</p> <p>This system incorporates a triple contact support between the body and adapter for extreme rigidity and accuracy.</p>	 <p>Turret HSK SmartChange</p>	 <p>60° Clamping Un-Clamping</p>

The patent pending Alberti  **SmartChange** collet clamp & wrench system quickly and precisely locks the quick change adapter, reducing tool cutter changing time to a minimum.
