

## Satellite Imagery

### NOW INCLUDED WITH SIRRUS PREMIUM SUBSCRIPTION

With the release of Sirrus Version 4.2, satellite imagery will be included in Sirrus Premium subscriptions with no additional fee. Users who purchase Sirrus Premium may enroll as many fields as they wish and enrolling fields from the app couldn't be easier.

Premium Imagery will be delivered in resolutions of 10 Meters and 30 Meters at least once per week, sometimes more frequently. Users will receive three transforms of each image including True Color, NIR and NDVI and all imagery will sync via agX Connections.

Sirrus Premium is a full-featured mobile solution that will bring a ton of value to agronomists and growers. Users can generate recs and reports based on geospatial scouting. Access to side-by-side comparisons of imagery with any data layers that have been

collected on a field. There are too many terrific features and activities in Sirrus Premium to mention in this note. All of the benefits of Sirrus Premium empower collaboration between farmers and their most trusted advisors. See the following page for details.

### PREMIUM IMAGERY HIGHLIGHTS:

- A Sirrus Premium subscription is required to view any imagery including third-party subscriptions.
- All images are delivered. You decide whether to accept or reject the image based on visual cloud cover.
- Images delivered in native resolution (Sentinel 10m, Landsat 30m).
- Share a quick PDF report of imagery via email, text message or Dropbox.
- Use imagery in the background for any activity to guide Scouting or creating recommendations.
- Enrolled images sync to agX for use with any other agX compliant application like SST Summit.
- No limit on number of fields you can enroll.
- Side-by-side comparison maps of imagery and other layers.

## What is added or improved with Premium?

### GENERAL
