

PreSET-3: SWET EBD

AIM

The Survival Systems USA PreSET-3: SWET EBD is specifically developed to train flight personnel in the basic procedures necessary to egress a ditched aircraft and survive on the surface with and without compressed air devices.

CONTENT

This one (1) day course (6 hours) is comprised of academic instruction and practical exercises to achieve the course academic and performance objectives:

- Hazards to aircraft and personnel during overwater operations
- Safety and survival equipment utilization
- Pre-ditching considerations and procedures
- Proper brace positions, emergency exit jettisoning and cabin evacuation (academic & practical)
- Emergency Ditching and Underwater Egress considerations (academic & practical)
- Principles of Emergency Breathing Device (HEEDS/HABD/SEA) operations
- Compressed air physics and physiology
- Emergency Breathing Device (HEEDS/HABD/SEA) equipment familiarization
- Emergency Breathing Device (HEEDS/HABD/SEA) clearing and use procedures
- Shallow Water Egress Trainer - SWET™ (academic & practical) – without EBD
- Shallow Water Egress Trainer - SWET™ (academic & practical) – with EBD

PREREQUISITE

A statement of health form must be completed on the day of the course. Students are expected to be in a good state of health and physically capable of fully taking part in all program instruction and activities.

No Swim test required.

CERTIFICATION

Students that meet the academic and performance standards will be issued a certificate of completion from Survival Systems USA, Inc.

COST

Tuition costs for this course are based on the number of training days required.
