### Add tele-dentistry to your telemedicine service offering

A two-phased tele-dentistry solution combining technology with quality immediate-access dental care AND next day follow-on care for the 6-7 million patients who annually suffer and urgent oral care/dental problem.

## The TeleDentists Fills A Massive Void In The Healthcare Market

- 6-7 million patients annually have an urgent oral/dental care need
- The average American hasn't been to a dentist in the past 3 years
- Over 50% of Americans have no dental insurance
- In 2016, 2.1 million patients went to an ER or Urgent Care clinic seeking help for a dental problem. They wasted time and money because knowledgeable professionals don't work at those locations.

## The TeleDentists Connect Your Members And Employees To A Quality Dentist Within Minutes

- Video interaction via computer or smart phone
- Diagnosis provided and corrective action prescribed
- Antibiotic and pain med e-scripts sent to preferred pharmacy
- Follow-on appointment made to see a conveniently located, elite dental provider within 24 hours (if necessary)
- High patient satisfaction

## A 2-phase Quality Tele-Dentistry Solution

### PHASE 1

- Patient uses web browser or mobile device to initiate a quality dental video consult
- Supplies demographic data and prior medical history, describes the oral care problem
- Data reviewed by on-call, Board licensed dentist
- Dentist joins the patient in the video consult room, performs assessment and offers a diagnosis
- If an anti-biotic and/or non-narcotic pain med is needed, an e-script is sent to the patient's pharmacy of choice
- A PDF summary of the event available to patient

### PHASE 2

- If patient needs face-to-face dentist follow-on care, The TeleDentists administrator/scheduler sets that up
- Identifies one of the thousands of network dentists holding time on their calendar the next business day for urgent need patients
- Selection of follow-on dentist based on Patient need (i.e. root canal); Insurance (to choose an in-network dentist); Convenience (by location, day and time)
