**See a dentist when you need them most.  
Which isn't always when they're available:)**

The TeleDentists provides the virtual technology to allow you to receive a dental consultation on your phone or computer when you need them. Your TeleDentist can provide a virtual consultation, prescribe an e-script (for antibiotic and/or non-narcotic pain medication) and even book a follow-on care appointment for you within 2 business days.

# YOU CAN VIDEO CHAT WITH YOUR DELIVERY GUY. WHY NOT YOUR DENTIST?

Technology is great. Video technology has the ability to free us and connect us at the same time. The TeleDentists is the first telehealth company to bring virtual dental consultations to the public. It's about time.

## The dental care system is broken

- **6-7 million patients annually** have an urgent oral/dental care need
- **Over 3 years** since the average American has been to a dentist
- **Over 50% have no dental insurance**
- **2.1 million visits to ER or Urgent Care clinic** for dental problems

## Together, we can fix this

The TeleDentists Virtual Technology empowers you to take control of your dental health by overcoming your biggest hurdle. Getting to the dentist!

A virtual consultation by a licensed dentist from the comfort and convenience of your desktop or mobile device may make all the difference. Maybe it's a toothache you've been putting off, a cold sore you want looked at or just haven't seen a dentist in awhile. The TeleDentists can handle all of that.

If a follow-up visit is needed, we can take care of that through our growing network of dentists and you'll have an appointment at a dentist in your area within 2 business days.

## It's easy to get started

A few quick steps and you'll be speaking with a dentist in no time.

1. Use your smart phone, laptop, desktop or tablet to go to the membership specific URL provided to you as a member.
2. Click on the link labeled "Speak to a Dentist Now"
3. Follow the instructions on the pages and that's it! You'll be in your dentist's waiting room and having your video consultation usually in under 10 minutes.
