TheTeleDentists.com to get started

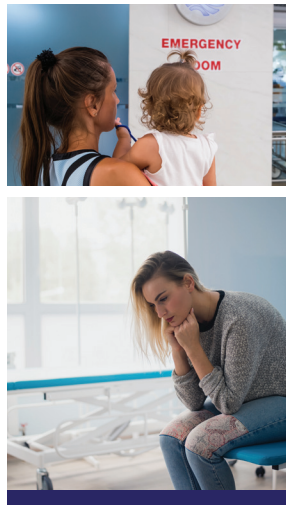

Reach more patients in less time, virtually

The TeleDentists provides the virtual technology to allow you to see more patients and treat more cases in less time. You can provide a virtual consultation, prescribe an e-script (for antibiotic and/or non-narcotic pain medication) and even book a follow-on care appointment for the patient.

JOIN THE FUTURE OF DENTISTRY TODAY

Telehealth is actually the fastest growing setting for alternative care. Better than urgent care clinics, retail centers, and ambulatory surgical centers. Now's a perfect time to get involved with The TeleDentists!

The current state of dental care in America

- **6-7 million patients annually** have an urgent oral/dental care need
- **Over 3 years** since the average American has been to a dentist
- **Over 50% have no dental insurance**
- **2.1 million visits to ER or Urgent Care clinic** for dental problems

Together, we can fix this

The TeleDentists Virtual Technology empowers patients to take control of their dental health by overcoming their biggest issue. Going to the dentist!

A virtual consultation by a licensed dentist (you) is a logical first step for re-introducing patients to the importance of good dental health by having a quality, professional dental consultation all from the comfort and convenience of their desktop or mobile device.

If a follow-up visit is needed, we can take care of that through our growing network of dentists.

It's easy to get started

If you have a dental license and some common equipment you can **add TeleDentist to your skillset**. It's really as easy as that and our virtual technology makes it convenient for you to see patients and provide the much needed service they require.

**Give us a call at 888.641.5505
or visit [TheTeleDentists.com](https://www.theteledentists.com)**

We'll go over everything you need to know and get you seeing patients virtually in no time. **Patients are waiting. Are you ready?**
