Expand Telemedicine for Urgent Care Centers by Adding Teledentistry

90% of Urgent Care Centers Now Use Telemedicine | Adding TeleDentistry Just Got Easier

Patients with toothaches or oral concerns need to speak to a dental professional

- Provide Dental Service via telemedicine before patients arrive in the emergency room or Dental problems assessed and diagnosed within minutes right in your facility with remote expertise
- Dental problems assessed and diagnosed within minutes right in your facility
- Healthcare providers able to focus on more urgent cases and less on oral health/dental concerns
- The TeleDentists can Relieve Strain on Healthcare Market
- 3.8 million patients visit an Urgent care clinic annually seeking help for dental and oral care problems
- Covid-19 has caused overwhelming strain on Urgent care clinics due to the need for Covid-19 testing

The TeleDentists Connects Patients at Your Facility to a Qualified Dentist within Minutes

- Connect your patients to our cloud-based teledental software at your facility
- Offer virtual dental consultations to an on-call dentist 24/7/365 – expands your hours of operation.
- Telehealth consult given, and corrective action prescribed by the correct healthcare provider
- High patient satisfaction
- Marginal revenue opportunity for your facility
- Add teledentistry services and bill your patient as normal
- Patient problem resolved quickly and cost effectively
- Complements your existing telehealth offering or can be used to counter telehealth offers from competitors
