# künzli Ortho®

- ▶ Stability Boots:  
Superior therapy for ankle and ligament problems
- ▶ Provide unique combination of therapy objectives

## Stability

Stability Boots stabilize the ankle and foot ligaments and prevent supination and tibia rotation.

## Mobility

Stability Boots conserve gait symmetry, allow controlled motion, and stimulate muscle activity. The stimulated metabolism helps reduce swelling and leads to faster recovery.

**Lateral stabiliation**

Even tension & support

Torsion resistance

← **A-Stabilizers (removable)**

← 5-Stripes lacing systems

← 3-Layer sole

## Testimonial regarding the Künzli Ortho Products

### **Dr. Victor Valderrabano, MD PhD,**

Associated Professor, Orthopaedic Department,  
University of Basel,  
Switzerland

### **Interview with Prof. Valderrabano:**

"In our Orthopaedic Department, the Künzli Stability Shoe is used with success for conservative treatment of ankle sprains, tendon ruptures, osteochondral lesions of the ankle, etc. as well as for aftertreatment and rehabilitation of ligament, tendons, and fractures surgeries around the ankle and hindfoot".

## Medical tests have demonstrated:

- ▶ an earlier and more balance rehabilitation of the injured ankle
- ▶ a faster return to work  
(approximately two weeks earlier in cases of ligament injuries)

## Advantages include:

- ▶ increased mobility, no crutches or cumbersome plastic walker
- ▶ pain reduction due to controlled dorsi and plantar flexion
- ▶ accessibility for hygiene or wound care
- ▶ shorter hospital stays
- ▶ less physical therapy
- ▶ fewer long-term complications

## Compared to Cast:

- ▶ Improved mobility
- ▶ More convenient
- ▶ Less medication
- ▶ Reduced need to treat thrombosis
- ▶ Reduced long-term damages (e.g. unbalanced gait)

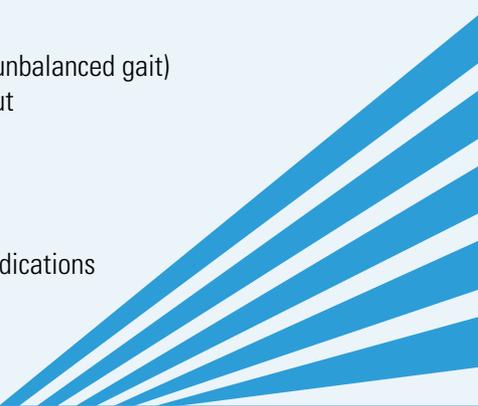

## Compared to Bandage:

- ▶ Improved stability
- ▶ Reduced long-term damages

## Compared to Walker & Hard Plastic Bandage:

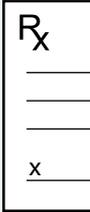

- ▶ Reduced long-term damages (e.g. unbalanced gait)
- ▶ Material does not break or wear out

## Economics

- ▶ Reduced absence from work
  - ▶ Reduced need for concomitant medications
  - ▶ Less need for physiotherapy
  - ▶ Fewer long-term damages
- 

# Medical Diagnosis

# Medical Prescription

## Ortho Rehab Total

Model: 45610  
Size: 4-13; no half sizes  
Width: G

### Indicated for:

- ▶ Achilles tendon rupture
- ▶ Postoperative/conservative treatment
- ▶ Ligament injuries of the hindfoot
- ▶ Arthrodesis
- ▶ Boot for orthoses

## Ortho Rehab 3

Model: 45580  
Size: 3-13  
Width: G

### Indicated for:

- ▶ Difficult or complicated injuries of ligaments or fractures of the ankle that need mediolateral stability (ie. malleoli fractures, lesions of the ligaments, osteoarthritis, fusions.)

## Ortho Night

Model: 47150  
Size: S/M/L

Night time Stabilizing Bandage  
for all indications.

## Ortho Sandal

Model: 45590  
Size: 36-47; no half sizes  
Width: I

### Indicated for:

- ▶ Instability of upper or lower ankle joints
- ▶ Ruptured ankle ligaments
- ▶ Distortions
- ▶ Forefoot problems

Nurse  
Orthotist  
Chiroprapist

## Ortho Standard

Model: 45597  
Size: 2-14  
Width: G

### Indicated for:

- ▶ Instability of upper or lower ankle joints
- ▶ Ruptured ankle ligaments
- ▶ Distortions
- ▶ Immediate post traumatic treatment
- ▶ Alternative to taping

## Rocky Plus Stahl

Model: 45127  
Size: 39-47; no half sizes  
Width: G

### Indicated for:

- ▶ Reinforced Stability
- ▶ Work Safety (steel toe)
- ▶ Lesions of the upper or lower ankle
- ▶ Lesions of the ankle ligaments
- ▶ Distortions
- ▶ Malleolar fractures
- ▶ Instability of ligaments
- ▶ Immediate post traumatic treatment
- ▶ Alternative to taping
- ▶ Supplementary advantage for alpine sports, work, safety

## Ortho Open

Model: 45600  
Size: 3-13; no half sizes  
Width: G

### Indicated for:

- ▶ Spastic or paralytic lower extremities
- ▶ Osteoarthritis
- ▶ Arthrodesis
- ▶ Birth defects
- ▶ Forefoot problems

# künzli Protect

## The Protect System

- ▶ Prophylaxis for unstable ankles
- ▶ Protection of healed injuries
- ▶ Provides needed support when running or playing sports

**Sprain-stop**

Patented 5 stripe fit-lacing

Medium-high cut

### With künzli Protect

- ▶ Diminishes the risk of tilting
- ▶ Supports foot and ankle
- ▶ Allows for strengthening of the foot muscles

### Without Protection

Conventional sports or leisure shoe.

**The Protect series is ideal for sports (hiking, indoor sports, tennis, biking, etc.) and leisure time. The leisure models are also excellent options for the elderly with specific orthopaedic problems.**

## Prophylaxis

### For Sports

- ▶ Abrupt stop or change of direction (tennis, ball sports, aerobice, cycling)
- ▶ Uneven terrain (walking, hiking, running, cross-country)

### Elderly People

- ▶ Insecurities when walking
- ▶ Weakened sense of balance

### In General

- ▶ Instable ankles
- ▶ Feeling of instability when walking

## Post traumatic usage

### After the medical treatment of an ankle injury

- ▶ Support of rehabilitation
- ▶ Aftercare for light stable protection

### Chronic pains

- ▶ After-effects of injuries
- ▶ Chronic instability

### Hike Protect | beige

Material: Hightec  
Sizes: 4–13  
Width: F/G\*

- ▶ Lightweight walking shoe

### Trekking Protect

Material: Leather  
Sizes: 4–13  
Width: F/G\*

- ▶ Classic leather walking shoe

### Country Protect

Material: Leather  
Sizes: 4–13  
Width: G

- ▶ Comfortable leisure shoe
- ▶ Especially suited for elderly people

### Ice Protect

Material: Leather  
Sizes: 4–13  
Width: G

- ▶ Warm lining city shoe
