Dankjewel of dank je wel

Hi, This suggestion is true, but not in this context. And so it translates to : "Yes, Thank You". We leave out the "wel" more often than not. I hope this clarifies it. This can cause funny moments, but can go horribly wrong as well. It's a tough language to start, but it's a nice one to know. Thanks for your reply. I should really consider your tip, as I already had few funny moments before by doing that. Your welcome. And trust me, Dutch and Belgian people speaking English can be quite funny too. Hi Donald - "Yes, thank you" really. If so, I agree!! When I mouse over wel, it says "thanks". Is this the equivalent of "thank you very much"? If someone asks if you want something, i thought you were supposed to say "Ja, alsjeblieft or Ja graag" because i said "ja dankjewel" to someone in the netherlands and they said it was incorrect.

It isn't incorrect though. If you go to a bar somewhere and they ask you if you want something to drink, you can perfectly say "Ja, dankjewel. Ik wil graag Although it might not be that commonly used. Ik wil graag. That's true. But all of them are polite and correct. It's the same difference as when in English you would say "Yes, thanks" or "Yes, thank you", you can use both just in some situations it is more appropriate to use "thank you" instead of "thanks". Between 'Ik ben wel een kind' and 'dank je wel' am I right to interpret this as 'indeed'. Even though this would be clumsy if literally translated, it serves the same purpose right? So the wel in 'dank je wel', is just a part of the saying thanks.

Did you? We use a lot of words in different contexts, over time, it'll be more clear where to use which word with a certain meaning. In a way ty is correct, but you'd better type "thank you" in full. I hope this answered your question. Well, I would of thought it would help to discuss the matter first. It didn't accept the compounded version, which is why I am here to say so. I wrote "thank you very much". It has accepted it but it has written that the default solution is just "thank you". There is a "wel"! The hover tips for this sentence were not helpful at all the solution doesn't seem right for the "wel" at the end. The equivalent is "graag gedaan", literally "gladly done". You may also come across "geen probleem" or "OK", but those sound a bit soggy. I said "Ja, dank je wel", but for some reason it didn't hear when I said "dank je wel" I imitate the pronunciation but duo says it is wrong and I miss my heart why you say I am wrong and take my heart the pronunciation isn't hard I think I am right.

Dank je wel should emphasize on the "Very much" part. Like French's Merci. To express the gratitude you say Merci Beaucoup. Get started. July 16, I think it's the same case as German "danke schön". July 17, It didn't accept "thank you very much" that's why I asked. July 25, Sure you love learning friend. Here is a lingot for you. October 7, MamaSmed Plus June 13, August 22, March 11, May 23, March 25, September 8, I like how smooth the word is Just saying it, is fun.

February 20, December 24, August 30, So conceptually, "dank je wel" is like "thank you" and "bedankt" is like "thanks"? November 7, Not entirely. Thank you is more formal than thanks. November 26, I hope this was an answer to your question. December 4, Why it does not take my pronunciation on? I have tried 4 times!!! June 2, February 26, This kinda sounds like she is saying DonkeyVille when she is really saying dank je wel August 19, March 26, Some treat it as a set phrase that has turned into one entity and others treat it as the phrase "ik dank je wel".

If you use it as a noun, it is one word "een dankjewel" a thank you, a token of your gratitude. Thanks, that's actually not too different from the German "recht herzlichen Dank", which is however rather formal. On the other hand, "dank je wel" might be closer to "danke schön" or "danke sehr" and "dank je" to "danke". I was thinking along the lines of "aime bien" in French where the "bien" doesn't actually add anything. In English, generally better to avoid "Thanks a lot," as this tends to only be used sarcastically to suggest that one is not really grateful or is insulted by somebody: e.

I can't say I've heard "Thanks a lot! I've heard "Thanks a bunch! It can mean a number of things. It means 'really', but in this case it just makes the 'thank you' or "dank je" slightly more formal. The Dutch seem to have lots of ways of saying thanks! Can someone please explain to me how this is "dank je wel" where every other time it has been "dank u wel" How come the u has changed to je? Thanks :. It explains that "u" is the formal "you", while "je" and "jij" are the unstressed respectively stressed informal second person singular "you" corresponding to "thou" in Early Modern English. If you have only ever seen "dank u wel" before that was probably just a coincidence. Shouldn't "dank je wel" translate to "thank you really? I'm confused. Why wouldn't this read more along the lines of "thank you very much"?

Doesn't "dank je" already mean thank you and since "wel" means really wouldn't the literal translation be "really thank you"? That's how I would understand it, yes. Though I'm not Dutch, so I can't say for sure, that is what I answered and it was accepted. Dank je is informal, for friends and peers. Dank u is polite and formal. Dank je wel is emphasised appreciation. So you're still saying thank you but it's the equivalent of saying thank you very much. Dankjewel, saying it fast as one word with a hint of disgust, can be used like the sarcastic 'thanks a lot'. Like saying thanks for nothing. Rather than thank you. Again, said with the right tone in the right context, can be used as sarcasm. It is a cognate to English "well" and in this case comparable regarding sentence structure to the "well" in "fare thee well" or "farewell".

A very literal translation into English would be "Thank thee Modern English: you well! Schrijf je de woorden los van elkaar, dan gedragen deze zich als een zin waarin het persoonlijk voornaamwoord wordt weggelaten. Dit komt overeen met zinnen als Dank u zeer, dank je hartelijk, dank jullie zeer. Hetzelfde onderscheid tussen informeel en formeel, tussen enkel- en meervoud geldt ook hier. Vind je dit soort taalvragen lastig en wil je er meer over weten, stel dan gerust je vraag aan De Schrijfdokter.

Onthoud mij. Een nieuw account maken. Top 25 Irritantste Taalproblemen Gratis download! Tussenwerpsel Schrijf je de woorden allemaal aan elkaar, dan is er sprake van een tussenwerpsel. Er zijn verschillende tussenwerpsels te benoemen: Dankjewel! Dankuwel voor deze kans. Dankjulliewel voor jullie hulp! Dankjewel of dank je wel — zelfstandig naamwoord Het aan elkaar geschreven tussenwerpsel kan ook als zelfstandig naamwoord worden gebruikt. Dit zie je in de volgende zinnen: Een dankjullie wel is hier op zijn plaats.

[dank je wel images

Bedankt is also used in sentences like. Have you thanked him already? Well, this all depends on location. In the Netherlands, dank je, is used quite easily, eg in shops, to people on the streets, In Belgium, dankje, is used, almost only if you really know someone very well. But even then, mostly we use danku. In a sense of degree. Than you have Hartelijk bedankt, which is really polite and formal. But again, all these things vary on the location you are, and the type of conversation you are having and with whom you are having it with. But Generally, danku is the best choice.

It's useable in formal conversations and is also very polite. Though, mostly when I go too the Netherlands and i use danku, they say I'm to polite. But Generally, u is always more formal and more polite than je. The same thing happened to me. I reported the error under the "other" tab and typed in that my answer should have been accepted. Report all errors, as they help to make the app better. Its funny to see the German and Dutch influence here in KY. We say "Thank you well" quite a bit here. What is the "Wel meaning in that sentence? My dad, a native Dutch speaker, always told me that means 'Thanks you very much' in oppose to "Dank" that means 'thanks'. However the "Wel" means 'really' emphasizing usually, so what does it means here? It still means 'really'. The usage is just a little different in Dutch, but the terms are essentially the same. For example, in English "I really like apples" means the same thing as "I like apples very much".

Really, who can explain me this? The rule of writing wel is when you negotiate something, but now how it can be negotiated, when at the beginning it is said "Ja" "Ja, dank je wel". Like when you bicker 'yes it is! But in this case there isn't really a translation of the 'wel' part in dankjewel. It just means thank you. You could maybe translate it to 'really'. Doesn't sound nice in English, but perhaps you get the point :P. I'm a bit confused - my monolingual brain is getting muddled with all the different ways to say thank you. Could someone please list them, as this would help me a lot!

I'm very new to Dutch, and am having a hard time understanding when to use which word for which meaning. The suggestion for 'wel' says 'indeed'. So my answer was "Yes, thank you indeed. Can someone tell what is wrong with this? Hi, This suggestion is true, but not in this context. And so it translates to : "Yes, Thank You". We leave out the "wel" more often than not. I hope this clarifies it. This can cause funny moments, but can go horribly wrong as well. It's a tough language to start, but it's a nice one to know.
