The papers deal with the topics related to the theme of the conference: "The mobile learning voyage: from small ripples to massive open waters". As the context of mathematics education rapidly changes— with an increased demand for mathematically literate citizenship; an increased awareness of issues of equity, inclusivity, and accountability; and increased efforts for globalization of curriculum development and research— questions are being raised more than ever before about the problems of teaching and learning mathematics from a non-cognitive science perspective. It concludes by identifying what might constitute holistic, inclusive, progressive and sustainable local and regional development, and reflecting upon its limits and political renewal. Due to the high number of submissions, paper selection was a difficult and challenging task, and many good submissions had to be rejected. Because we believe this work is culturally important, we have made it available as part of our commitment for protecting, preserving, and promoting the world's literature in affordable, high quality, modern editions that are true to the original work. Combining ethnographic field-work, historical research, and network analysis, "Building Globalization" closely scrutinizes the growing phenomenon of transnational architecture and its profound effect on the development of urban space. It's easier than you may think.
