Exploring Metalworking PDF Book

Provides a much-needed diachronic approach to theories of metaphor and metonymy within cognitive semantics, building on the work of scholars such as Geeraerts and Sweetser. Argues that a diachronic approach offers a fresh perspective which can both complement and challenge current theories of metaphor and metonymy. Explores both cognitive and cultural issues relating to motivation, and takes account of established theories of semantic change alongside recent work in cognitive linguistics. Considers three of the concepts that have been important in the way intelligence is conceptualized diachronically: the senses, density, and animals. Includes a detailed case study of these source concepts which provides a starting point for a wider discussion about the nature of mapping processes. Gender.
