QUALITY
Bespoke Shutters

High quality custom made shutters produced in Britain

THE FAUX WOOD Shutter Story

Our beautiful, bespoke shutters are made-to-measure on site in the UK by highly trained staff. Fauxwood shutters are made from a composite material. The resilient, durable finish looks like wood but will not fade, crack, chip or warp. There is very little difference in terms of visual aesthetics. Cleaning our shutters is simple and they require very little maintenance.

OUTSTANDING CHOICE

We believe we have an outstanding collection for you to choose from and inspire you. Our shutters are not only beautiful but practical, giving you long-lasting durability and more control of light. Our range offers the choice of café style, tier-on-tier, full height & tracked shutters. Our Shutters will meet your individual requirements and are hand crafted to a high standard.

QUALITY, QUALITY, QUALITY

As our products are all bespoke, you can choose the finish and colour to suit you. Choose from our two ranges - De Montfort with a classic, standard snow white finish or Eleanor, with 6 standard colours as well as an option to colour match to any current paint chart or RAL colour. We take pride in offering both a quality, British made product and a high-quality customer service. They are perfect for each and every room and will complement any style of home.

Café Style

Panels designed to cover only the lower section of the window. This style offers both privacy and a flood of natural light to enter through the exposed glass.

SHUTTER STYLES

HIGH QUALITY CUSTOM MADE SHUTTERS PRODUCED IN BRITAIN FOR TRADERS.

HIGH QUALITY CUSTOM MADE SHUTTERS PRODUCED IN BRITAIN

Tier on Tier

Designed for complete control over light, privacy & view. Two sets of panels that sit on top of each other. They offer versatility as the top and bottom operate independently to each other.

Full Height

The most popular choice. Designed to cover the full window height. Options to have the top 1/3 or 1/2 operate independently to the rest, allowing privacy and light to be fully controlled.

HIGH QUALITY CUSTOM MADE SHUTTERS PRODUCED IN BRITAIN

Tracked

Shutters that slide open and
concertina back for easy access.
Particularly used for
patio doors.

Frame TYPES

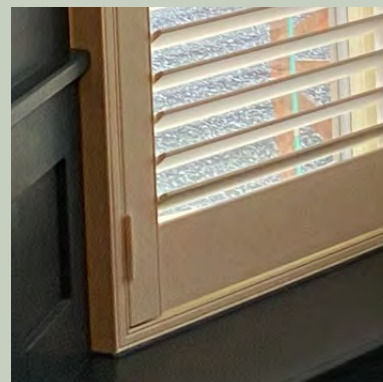

L FRAME

Allows the shutters to be fitted in the recess of the window. Available in standard 46mm or large 65mm.

Z FRAME

The shutters are fitted on the edge of the recess with a decorative trim surrounding the edge.

F FRAME

The shutters are fitted on the outside of the recess.

Louvre TYPES

We supply 63mm, 76mm or 89mm louvres, giving plenty of choice for varying shutter sizes. Louvres over 500mm in length are reinforced with an aluminium core making them extremely strong and durable.

Tilt Options

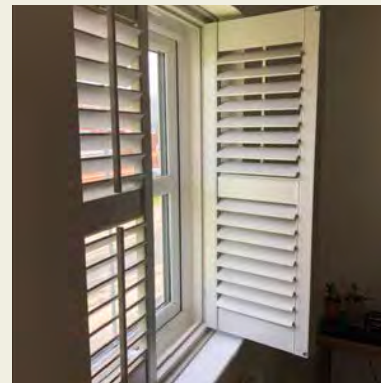

Choose from Centre Tilt Rod, Offset Tilt Rod or our most popular choice, Hidden Tilt Rod.

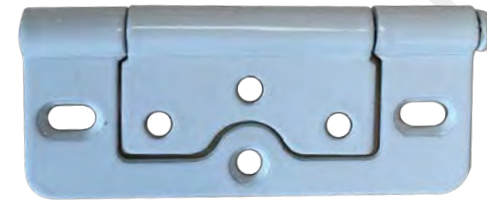

HIDDEN

WHITE

CHROME

BRASS

Hinge Options

We offer
White, Chrome or Brass hinges.
On painted doors,
we can match the colour of the
door with the hinge.

Colour Options

We currently have 2 ranges for our shutters:

THE DE MONTFORT RANGE:
Pre-painted in standard, Snow White.

THE ELEANOR RANGE :
Available in 6 colours as standard. This range can also be colour matched to any paint chart/RAL colour at an additional cost.

STANDARD COLOURS

WHY CHOOSE

Our Shutters?

A truly bespoke, British made product manufactured by us in Evesham, Worcestershire.

Complete control of light.

Total control of privacy.

All of our shutters come with a 10 year warranty.

Our fauxwood shutters are made from a solid composite material offering a whole host of benefits:

- Re-enforced with an aluminium core making them extremely strong. Louvres over 500mm in length will also have aluminium core so they do not bow in the centre.
- They will not warp, peel or flake over time due to the extremely strong and highly durable material.
- They are completely waterproof meaning they can be fitted in every room in the house including wet rooms/bathrooms.
- They offer fantastic insulation for both sound & heat. Not only do they help stop cold air entering during the winter but they also help rooms stay cool during the summer. Their sound insulation helps block out noise making them fantastic for homes near busy roads.
- Save on your energy bills and block out the noise.
- The product is a Class A, non-combustible, inorganic insulation material, giving it a fire resistance limit of over 3 hours, giving great peace of mind.
