

SLP CLINICAL KITTING APPLICATIONS

Bulk-to-Clinic

Serving genetic, molecular, microbiology and clinical labs nationwide, Strategic Lab Partners is your convenient, trusted source for bulk lab supplies and lab-related printing. Its 18 distribution centers and central US location provide clients of Strategic Lab Partners with rapid fulfillment of bulk specimen collection and transport components without delay.

Clinical Trials

Strategic Lab Partners ensures the integrity of clinical trial samples by utilizing only FDA Class I & II specimen collection and transport products. Its considerable value-adds like barcode labeling, real-time tracking and reporting, and return logistics make clinical trials kitted by SLP timely and more reliable.

Direct-to-Consumer

Strategic Lab Partners manages its direct-to-consumer kitting from package design and production to e-commerce setup and fulfillment, and its updates clients every step of the way as it follows the exact specifications and deadlines of projects.

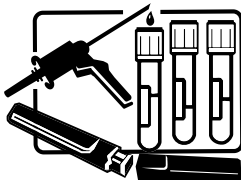

Genetic

Remote genetic sampling has never been more accessible, safe, and secure. Strategic Lab Partners specimen collection and transport kits protect and secure samples for easy shipping, bar coding, printing and labeling, warehousing, inventory management, inbound and outbound logistics, and real-time tracking and reporting.

Healthcare

The specimen collection and transport kits from Strategic Lab Partners make at-home healthcare more accessible and easier to use. Its kitting solutions provide a convenient and nonobtrusive means for rapid testing, more informed diagnoses, and treatments.

Phlebotomy

SLP supplies clinics and laboratories with superior kitted and bulk supplies to achieve fast and accurate results from their required protocols and tests. It works closely with clinic and laboratory clients to design sampling kits for secure and safe blood collection and transport.

Toxicology

Oral fluid and urine point-of-collection, rapid screening products, and specimen collection and transport kits by Strategic Lab Partners enable its clients to sample peoples' unknown ailments and make informed decisions about substance abuse and poisonings faster and more accurately.
